

Table 1: Scottish Greenhouse Gas Emissions, 2012

Source of greenhouse gas emissions	Greenhouse gas emissions in 2012 (million tonnes CO ₂ eq)	Share of 2012 emissions (%)
Energy supply	17.13	32
Domestic transport	10.54	20
International aviation and shipping	2.36	5
Business and industrial process	8.53	16
Residential	7.28	14
Public sector	1.37	3
Waste management	2.77	5
Development	1.68	3
Agriculture and related land use	11.17	21
Forestry	-9.92	-19
Total	52.9	100
